by the Organization of European Cancer Institutes (OECI)
and the Czech Society for Accreditation in Healthcare.

Expedited Review of Clinical Trial Agreements ("Fast Track")

In connection with the **FAST-EU** pilot project, we are offering clinical trial sponsors a new service for the expedited review and execution of clinical trial agreements, effective July 1, 2026. Our goal is to streamline start-up processes as much as possible and enable studies to begin sooner.

Under the "Fast Track" program, we guarantee complete contract review, budget approval, and final signing **within 10 weeks** of receiving a complete draft.

Fees for Expedited Review

The "Fast Track" service is subject to an increased start-up fee of **70,000 CZK**, payable upon signing the contract.

Conditions for Using the "Fast Track" Service

To have a study included in the expedited process, the following conditions must be met:

- **Clinical trial approval via FAST-EU**
- **Complete documentation:** Submission of a complete draft contract and budget.
- **Use of Approved Contract Templates:** The draft contract must comply with **one of the following options**:
  - Use of a valid framework agreement concluded with MOÚ.
  - Use of a contract template with the sponsor that has been successfully negotiated, approved, and signed with MOÚ, provided that no more than 2 years have elapsed since the signing.
  - Use of the Ministry of Health of the Czech Republic's national template for clinical trials without any modifications. The only attachment is the budget table.
- **Clear budget**: The budget must include the amounts published in the excerpt from the internal price list on the MOÚ website
- **Start-up questionnaire:** Submission of a fully completed start-up questionnaire simultaneously with the draft contract.
- **Internal approval:** Inclusion in the "Fast Track" program is subject to approval by MOÚ. The sponsor will receive confirmation of the possibility of expedited review from the contact person listed below **within 3 business days** of receiving the proposal.

The contract may be signed even before receiving the decision on KH approval, which must be submitted prior to the SIV.

If the above conditions are not met (e.g., submission of incomplete documentation, the need for extensive revisions to an unapproved template, long response times from the other party, or disagreement on the budget), the contract review will automatically be transferred to the standard process and subject to the standard fee.
